

Wildlife Refuge for the next 15 years. The alternative that appears to best meet the Refuge purposes is identified as the preferred alternative. The preferred alternative is identified based on the analysis presented in the Draft CCP/EA, which may be modified following the completion of the public comment period based on comments received from other agencies, Tribal governments, nongovernmental organizations, or individuals.

Under Alternative A, the no action alternative, we would continue to manage the Refuge as we have in the recent past. Existing tidal restoration activities would continue. The existing hunting, fishing, wildlife observation, photography, environmental education, and interpretation opportunities would remain unchanged.

Under Alternative B, the Service would develop an inventory and monitoring program; expand tidal restoration and enhancement activities for the benefit of migratory birds, endangered species, and other native wildlife; improve and expand visitor services by developing new public access locations; develop shoreline fishing locations; and provide some additional environmental education programs.

Under Alternative C (preferred alternative), the Service would incorporate those developments outlined in Alternative B, but would also emphasize wildlife management by studying population health and developing population goals for wildlife; provide greater interpretive opportunities; and substantially expand the environmental education program.
